Scope of work :	Facility planning, interior designing, MEP services and assistance, execution assistance.

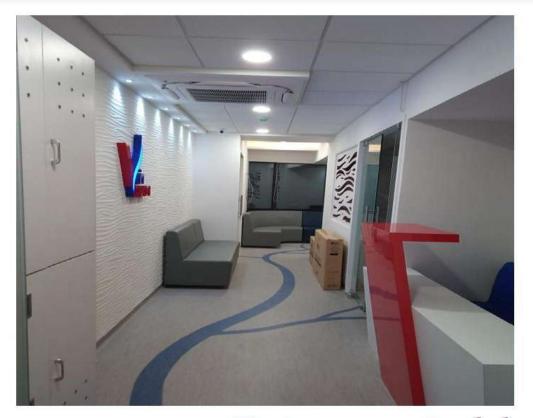

Gokul Scan & Diagnostic Centre, Mulund, Mumbai

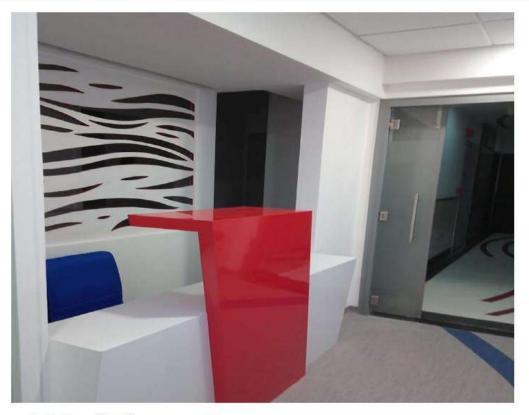

- The spaces are designed keeping in mind the client's simplistic approach by introducing the concept of Colour Blocking using pastel shades as highlight wall.
- Soothing colour palette was used in order to comfort patient's vision.
- This project was taken up by our team in Turnkey execution and marks a beginning to our new division of Turnkey projects.
- The brief was to design a simple design for a diagnostic facility as the client was cautious about cleanliness being maintained in the set-up due to the age group of his patients.
